THE VOLUNTARYISTS

are libertarians who advocate nonpolitical strategies to achieve a free society. We reject electoral politics, in theory and in practice, as incompatible with libertarian principles. Governments must cloak their actions in an aura of moral legitimacy in order to sustain their power, and political methods invariably strengthen that legitimacy. Voluntaryists seek instead to delegitimize the State through education, and we advocate withdrawal of the cooperation and tacit consent on which State power ultimately depends.

"If one takes care of the means, the end will take care of itself."

Technology Brings Freedom!

... and, lo! from the fiery heart of the laser, a voice spake, saying, "Go forth and tell the people that if they eschew liberty until 51% of their brethren are persuaded not to enslave them, then they will live and die in chains--but that technology can give them freedom in the here and now! Speak unto Objectivists, Libertarians, Discordians, survivalists and soldiers of fortune--and take special pains to reach computer hackers, electronics phreaks, and high-techies of all sorts. Speak even unto those who sail with Brother Tim Leary's Spaced Cadets and those who worship with G. Gordon Liddy at the Church of the Open Bolt, for while ye seek a John Galt or a Hagbard Celine, forget not that an Uncle Duke may make an invaluable contribution to your data base. Therefore let all who grok technology and love liberty request free subscriptions to the Project newsletter ..."
